PROPYLON® LWB360 COUNCIL APPLICATION

OVERVIEW

Cities and large municipalities need legislative management systems that are tailored to their specific processes. Existing solutions are too rigid in their approach, equating the needs of a city of 500,000 people with a town of 2,000 citizens. This presents an obvious shortcoming in the current market offerings, but there are others too. Clunky, dated tools make searching and tracking items unnecessarily time-consuming and difficult, while the lack of a fully integrated system means errors can occur more frequently, information is harder to find, and processes are slower and less efficient. More flexible and user-focused tools are needed to enhance the management of meetings and the process of amending legislation, provide openness and transparency, and to make publishing the information easy and accessible to everyone.

WHY PROPYLON® LWB360 COUNCIL?

The Propylon LWB360 Council application offers a modern, fully integrated solution that meets the unique and customized objectives of its users, delivering a modern and user-friendly product.

OBJECTIVES

- Provide a configurable environment that can be localized to your specific workflows
- Make information easy to find to reduce the number of queries coming from the public
- Enhance transparency
- Integrate entire legislative history into a document repository
- Create a user-friendly, fully mobile-optimized, web-based system
- Provide complete and seamless conversion of existing data
- Offer enhanced tools to increase accuracy and efficiency
- Create custom and automated reports

PUTTING THE CUSTODIANS OF THE LEGISLATIVE PROCESS FRONT AND CENTER: SAVING CLERKS TIME BY IMPROVING FLEXIBILITY, EFFICIENCY, AND ACCURACY

KEY BENEFITS

- Generates meeting agendas and minutes with the most-up-to-date information in the format you want at the click of a button
- Provides enhanced tools to search and track items
- Publishes documents in real-time to help support Council members and public engagement
- Allows clerks to find all existing data at the click of a button and reuse it
- Automatically notifies you when a meeting is scheduled
- Removes the need for rekeying of information, saving you time and improving accuracy
- Enables the public to search through all documents, both historical and current
- Publishes information in machine-readable formats to allow groups to build apps on government data
- Enables better automated data transfer through APIs, XML, and other formats
